PREFACE.

In presenting this, my SECOND ANNUAL CATALOGUE, with the hope that most of the animals owned at Sherman's Stock Farm may be found equal, in point of high breeding, to those of any similar establishment, such, at all events, has been my aim, and I have spared no labor or expense to gather the best material which, in the light of experience and tangible results, has been most uniformly successful in producing a high rate of speed—my stallions are mostly of the Hambletonian-Star cross, which has proved to be second to none—I have, and am crossing my stallions on mares of good individuality, and the best of producing lines in Kentucky, with results which are very satisfactory to me, my brood mares are numntry.

Stock Farm has increased very rapidly in the last year, for which I am well pleased. [redacted] are especially invited to Sherman Stock Farm, where my manager will take pleasure in showing them the stock on all days except Sundays.

Sincerely thanking the public for its liberal patronage, and hoping my manner of doing business will merit a continuance of the same, I am

ANNOUNCEMENT.

I have placed my high bred stallions at the disposal of the breeders of Kentucky, because I believe that here they would have better opportunities than elsewhere to demonstrate their great value as sires of trotters. It affords me the greatest pleasure to say that they at once became very popular, and received the most liberal patronage. All of them are by Rysdyks Hambletonian, the great progenetor of trotters—a horse that has been crowned king by general consent. All of them, but one, are out of daughters of American Star, a sire that ranks second only to Hambletonian, if due allowances are made for the time in which he lived, and his opportunities in the stud. Henry Clay 8, Abdallah 1, and American Star were cotemporary stallions and the best of their day. Henry Clay sired three trotters, three sons and three daughters that bred on. Abdallah, sired four trotters, one son and seven daughters that bred on. American Star sired four trotters, six sons, and thirty-four daugnters, producing forty-three trotters. That is to say American Star sired as many 2:30 performers as either Henry Clay or Abdallah. twice as many sons as Henry Clay and six times as many sons as Abdallah that bred on, and when it comes to the breeding on capacity of American Star's daughters, I think I am safe in saying they produced as many or more trotters as the daughters of all other stallions combined that had lived in or before his time. Some few are very loth to admit the inestimable value of the Star blood, but the records have settled the question forever, that it has produced the fastest and gamest trotters that have yet appeared on the trotting turf. I mention Dexter, 2:17¼; Bonnie McGregor, 2:16; Director, 2:17¼; Phallas, 2:13¾; Arab, 2:15; Guy, 2:12; Jay-Eye-See, 2:10, and the colt performers, Sable Wilkes, 2:18; Ed Rosewater, 2:20½; Axtell, 2:23; Sudie D., (yearling) 2:35¾, and these will suggest many more to the reader. Jay Gould, 2:20½; Orange Girl, 2:20; Nettie, 2:18, and Dexter 2:17¼, are all out of Star mares, and it is a fact worth remembering that Hambletonian, great as he was, never got a trotter of extreme speed except out of Star mares, and he sired 1,350 colts. That Hambletonian was a golden nich for the Star mares, all admit, but the Star is positive trot producing blood, independently of the blood of Hambletonian. American Star was a fast trotter himself, and his sons out of

unknown dams, sired trotters out of mares of unknown breeding. Fred Folger, 2:20½, and Guy, 2:12, (the fastest horse now on the turf) have no Hambletonian blood whatever. The records prove that the blood of American Star produces trotters in all sorts of combinations, known and unknown. His daughters have produced trotters by *seventeen* different stallions, some of which got one-half, others one-third of their trotters out of Star mares, and still others never got a trotter except out of a Star mare, thus proving the great prepotency of the Star blood. It is notorious that the Hambletonian Star stallions have not had equal opportunities in the stud with the other distinguished sons of Hambletonian. Dictator has been in Kentucky longer than any other, but when he was 20 years old he had less than 200 colts, 18 of which are already in the 2:30 list and among them Director, 2:17; Phallas, 2:13¾, and Jay-Eye-See, 2:10. The other Star stallions are all recent importations to Kentucky, and already among their very first colts Sheridan's Hambletonian has sired the sensational Sudie D., yearling record, 2:35¾. Aberdeen has sired Mulatto, 2:22; Waunita, 2:24½; Godelia, 2:29¼. Volunteer Star has sired Volkyr, 2:19¾, and Bethlehem Star, 2:20¾, in 1888. For the first time in their lives the Hambletonian-Star stallions are having first-class opportunities, and the blood, which under adverse circumstances has produced such true race horses, now with favorable opportunities, is confidently expected to produce still more wonderful trotters than those which have have gone before.

The first stallion, *Sherman's Hambletonian*, is much admired by experts as a noble specimen of Rysdyk's Hambletonian. His colts are just beginning to get before the public, being quite young. He sired, however, the sensational Sudie D., (yearling) record, 2:35¾, and many more that promise well. His breeding is superb, and he is very popular, because of the size and quality of his get. He promises well, both as a sire and a trotter, is regarded as one of the choicest stallions of the two farms.

Alexander H. Sherman, beyond doubt, is the nearest in resemblance to Rysdyk's Hambletonian in all the valuable parts and make-up of any other living horse.

Elevator is another grand specimen of the produce of Rysdyk's Hambletonian. He is a fast trotter, with all the style, action, and fine carriage of the Morgans. His record, 2:34¼, is no measure of his speed, having shown a private trial in 2:23½, and in a public race, at Waverly, N. J., half-mile track, was on the wheel of the winner, Glide, in 2:26½, which is considered as good as 2:23 on a mile track. He has bred but few colts, six or eight in all, which are unsurpassed for style, action, forma-

tion, and endurance, and though out of ordinary mares, are very fast roadsters of great endurance.

He is a sure foal getter, but as the services of the stallion have not been heretofore offered to the public, and having such a large number of Hambletonian's get, and so few mares, Elevator has not had an opportunity to gain that fame through his produce, to which his high qualities entitle him.

Hambletonian's Last is a gem of the first water, and with indifferent handling has made a record of 2:25¼. He has fine action, great endurance, and, being the last produce of his sire, is a wonderful specimen of that great family, and may prove as valuable in the stud as the first foal of Rysdyk's Hambletonian, Alexander Abdallah.

Paladine is a remarkably well turned stallion, with a trotting gait, style, and way of handling himself that is much admired. His colts model after him, and are very promising,

George F. Andrews has always been admired as perfection in all his parts, as well as in his style and beautiful trotting gait. With the little handling he has had, he has repeatedly trotted his mile over the ⅝ of a mile rough track at Battle Ground Stock Farm in 2:25. He transmits his form and action, hence his produce are admired and promising.

Hambletonian Gem is another specimen of his famous sire that is much admired,—has never done service at the stud until 1886. He is quite speedy, has shown miles with inferior handling in 2:27, and repeated in 2:25 on Hampden Park, Springfield, Mass, which is but a meagre test of his capacity for speed.

The celebrated Smith mare, the first dam of the four preceeding stallions, was a beautiful bay mare, 15½ hands high, very fine and stylish, fine cut head and neck, good, stout, clean, flat bone, of remakable substance and individuality, speedy conformation, and was regarded as one of the best daughters of American Star, was used on the farm and road, and could pull two men in a top wagon on the road any time in 2:40, which was remarkable for an untrained mare; was not bred until 16 years old. Sherman has not been handled but very little for speed, but has showed ability to beat 2:20. Hambletonian Gem has showed 2:25 in his exercise. Paladine has shown 2:34 in his ordinary exercise since he has been in Kentucky, and George F. Andrews, 2:25, which shows conclusively that they could all beat 2:20 if they had been handled for speed. Their second dam by Crabtree Bellfounder, a son of Imp. Bellfounder, the sire of the (Chas. Kent mare) dam of Hambletonian (10). From the best information we can get, Imp. Bellfounder was an extraordinary specimen

of the equine race, and beyond a doubt his daughter (the Chas. Kent mare) proved a great factor in the production of the old hero of Chester Hambletonian, (10) in other words, if it had not been for Imp. Bellfounder we would not have had such a great Hambletonian.

The other fine young standard stallions now coming into prominence are: Lambert Clay, Wonderful, Duroc Wilkes, and Ruskin Wilkes, sons of the famous sires George Wilkes, Harry Clay, Volunteer, and Mambrino Pilot.

Gentlemen wishing to purchase any of the stock that may be for sale, can have them priced on making selection.

The pedigrees in this catalogue may be relied on, great pains having been taken to trace them out. The pedigrees of a few of the colts and fillies are incomplete, owing to the failure of the breeders to send them in up to the time the catalogue went to press.

strong flat bone, on good feet, of a very speedy conformation, and can show that he is a trotter; although he never had any regular training, he can speed a 2:20 gait any time in his exercise. He is of the Hambletonian and American Star combination, the blood that breeds on, a sure foal getter, and his colts are large, likely, of good bone and substance, good gaited, and show speed, and will sire good race horses when mated with good dams, which he has proven by the performance of Sudie D., yearling performance of 2:35¾, and she is regarded as one of the best youngsters in the United States.

NOTE.—Hambletonian's Last is a beautiful brown stallion, 15½ hands high, of very fine form, style and action; good, flat leg, well set on good feet; handsome head and neck, well set on powerful shoulders; strong back, loin, hips and thighs. In other words, he is one of the handsomest stallions in Kentucky, and his present record, 2:25½, is no measure of his speed. He is a sure foal-getter; his colts are good size, color, and gaited like trotters, and a little time is all that is required to show the ability of this horse to sire fast and game race horses.

THE STANDARD OF ADMISSION TO REGISTRATION.

The following are the rules for the standard of admission to registration recently adopted by the National Association of Trotting Horse Breeders:

FIRST.—Any stallion that has himself a record of 2:30 or better, provided any of his get has a record of 2:35 or better, or provided his sire or his dam is already a standard animal.

SECOND.—Any mare or gelding that has a record of 2:30 or better.

THIRD.—Any horse that is the sire of two animals with a record of 2:30 or better.

FOURTH.—Any horse that is the sire of one animal with a record of 2:30 or better, provided that he has either of the following additional qualifications: (1) A record himself of 2:35 or better; (2) is the sire of two other animals with a record of 2:35 or better; (3) has a sire or dam that is already a standard animal.

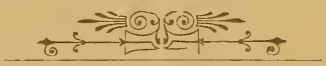
FIFTH.—Any mare that has produced an animal with a record of 2:30 or better.

SIXTH.—The progeny of a standard horse when out of a standard mare.

SEVENTH.—The female progeny of a standard horse when out of a mare by a standard horse.

EIGHTH.—The female progeny of a standard horse when out of a mare whose dam is a standard mare.

NINTH.—Any mare that has a record of 2:35 or better, and whose sire or dam is a standard animal.



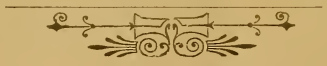
Terms for Keep.

Stock from a distance will be kept in the same manner as I keep my own, at the following rates, but no responsibilities assumed for accidents or escapes.

Mares per year	$70 00.
Mare per summer months	4 00.
Weanlings from Oct. 1st to May 1st, per month	8 00.

All bills for keeping stock will be due when presented.

Mares bred by the season, money due at the time of service. Mares bred by insurance, money due the following January 1st.



MILE AND HALF-MILE TRACK.

For a mile track, select your ground suitable; draw or run two parallel lines 440 yards long, and 291 1/3 yards apart; get the radius (or center between the ends of the two parallel lines) and drive a stake; attach a rope or wire to this stake long enough to reach to end of one parallel line; attach a handspike or sharp stake to the rope or wire so as to measure exactly to the end of parallel line; keep rope or wire tight; walk around in a half circle; mark and stick stakes as far apart as you want your fence posts; treat other end of the parallel lines same as those mentioned, and you will have a perfect mile track, three feet from the pole or fence. The turns should be elevated one half-inch for every foot in width.

For a half-mile track, draw two parallel lines 220 yards long and 144 2/3 yards apart; measure and make the half-circles (or turns) same way as for mile track, and you will have a perfect half-mile track three feet from the pole. The turns on half-mile track should be elevated one inch to the foot in width.
